REPORT  
OF THE  
COMPTROLLER OF THE CURRENCY

---

TREASURY DEPARTMENT,  
OFFICE OF THE COMPTROLLER OF THE CURRENCY,  
*Washington, December 7, 1931.*

SIR: I have the honor to submit the following annual report in accordance with the provisions of section 333 of the United States Revised Statutes, covering activities of the Currency Bureau, in the year ended October 31, 1931. This is the sixty-ninth report made to the Congress since the organization of the bureau.

**LEGISLATION RECOMMENDED**

In my last two annual reports to Congress, and in my appearance in 1930 before the House Committee on Banking and Currency, and in 1931 before the Senate Committee on Banking and Currency, I made definite recommendations for new banking legislation and set forth the facts and circumstances upon which those recommendations were based. The economic developments of the past 12 months have given no occasion for alteration of the substance of those recommendations, but have rather created a more urgent necessity for the proposed legislation.

In brief, the purpose of the legislation recommended is to supplement our system of unit banking by permitting the stronger and better-managed city banks to carry on banking operations in the surrounding rural communities by means of branch offices. It may be well to say again that operation of this type of branch banking would not be made compulsory upon national banks, but would be a power conferred upon them to be exercised at the discretion of their boards of directors, upon approval in each instance by the Comptroller of the Currency. Once this opportunity to engage in branch banking is granted by Congress to national banks the establishment of the branches will undoubtedly be a gradual development for the reason that sound management on the part of the banks will not favor a rapid expansion of bank operations, nor will the Comptroller of the Currency be expected to approve the establishment of branches under any other than a conservative policy. The normal method of acquisition of branches would be through the voluntary merger or consolidation of local rural banks with the proposed parent city bank.

The term "trade area," which I have used to designate the geographical territory into which branches should be extended from commercial centers in which important national banks may be situated, will be found to be fully described in my last annual report to Congress.

My report for 1929 contained a comprehensive review and analysis of our system of independent rural unit banking, in which was disclosed fundamental weaknesses in that type of bank organization. Attention was directed to the failure of more than 5,000 of these banks in the 9-year period prior to the stock market decline in the fall of 1929 and before the initiation of the current economic depression. I mention this for the reason that there has been a disposition to consider the same type of bank failures for the years 1930 and 1931 as being attributable to the economic depression, whereas they should be considered as a continuation of conditions existing for more than a decade past but accelerated no doubt in 1930 and 1931 by the intensification of the adverse economic conditions confronted by the banks in the rural districts.

During the period from January 1, 1921, to September 30, 1931, inclusive, there have been over 8,000 bank failures. Of this number no less than 4,800 (or 60 per cent) were banks with a capital of \$25,000 or less, while the banks in the larger cities having a capital of \$1,000,000 and over contributed only 37 of these suspensions—about four-tenths of 1 per cent of the total number recorded.

Approximately the same ratios are shown in the figures compiled for the 12 months ended October 31, 1931, which witnessed the failure of 2,342 banks, with aggregate deposits of \$2,008,729,000. While this is the largest number of failures ever recorded in any similar period the character of the banks and the underlying causes of failure are not fundamentally different from the failures in the years immediately preceding. With few exceptions the banks in the large cities, which may be properly classed as metropolitan banks and which hold the bulk of the deposits in our banking system, have continued to demonstrate their soundness and strength throughout the entire decade which we have under consideration, including the depression years of 1930 and 1931.

Many country banks, in certain localities which have not been called upon to face the disastrous runs brought about by the general public hysteria which has been so prevalent in many sections of the country, have also managed to weather the economic and psychological storm; however, a comparison of the metropolitan banks with the small-unit banks shows an overwhelming percentage of failures in the latter class and clearly indicates that our present banking problem is one that concerns primarily and fundamentally the rural communities and which can not be automatically solved by the return of general prosperity.

In order to bring the whole question statistically and graphically to view a number of charts are presented below.

In these charts comparison has been made between national banks and banks organized under State laws which are engaged in the commercial banking business in the same manner as national banks. All types of strictly savings banks are therefore excluded, as are also private banking concerns. The comparison has been made in this manner for the reason that the national banking system was inaugurated as a nation-wide system of commercial banking and remained for many years in control of the bulk of commercial banking resources. With the State banks are included the trust companies which are engaged in the commercial banking business. The purpose of these charts is to illustrate the development of commercial banking under Federal supervision in contrast with a similar and parallel develop-

ment of the same type of banking under the supervision of the respective State governments, and to indicate, also, the relatively greater stability of the metropolitan banks of larger capital over the smaller banks of rural communities, under the stress of adverse economic conditions.

*Number of commercial banks by years, 1863-1931.*—The table and chart following show that the national banking system at its inception was the chief means of carrying on the commercial banking business, the State commercial banks having been largely absorbed. However, by 1865 State banks again began to be organized, and continued gradually thereafter to increase in numbers until by the year 1894 they had surpassed in number the national banks. From that time the number of State banks and trust companies doing a commercial banking business increased much more rapidly than the national banks, and in 1921 numbered 20,349 as compared with 8,154 national banks. There has been a gradual decrease in the number of State banks since 1921, and in the number of national banks since 1923, there being 13,728 State banks and 6,805 national banks at the close of the fiscal year 1931, the State banks then being about twice the national banks in number.

*Resources of commercial banks by years, 1863-1931.*—The table and chart following give a graphic comparison of the development of commercial banking resources in the United States under their respective jurisdictions, national and State. It shows that the State banking institutions began effectively to engage in commercial banking in competition with the national banks about 10 years after the inauguration of the national banking system. By 1885, the State banks controlled about one-fourth of the commercial banking resources of the country. From this date onward there was a gradual relative increase of commercial banking resources in State institutions. By 1910 they held about 45 per cent of all commercial banking resources, and 10 years later they held slightly more than 50 per cent. By 1930, State bank commercial resources exceeded that of the national banks by \$3,800,000,000.

A discussion of the significance of this development of commercial banking resources under the control of State institutions is contained in the reports of the Comptroller of the Currency from 1924 to 1930, during which time the attention of Congress has been directed repeatedly to the steady loss of control by the Federal Government over the operations of commercial banking, a field of banking falling peculiarly under the jurisdiction of Congress by reason of the fact that practically all commercial banking relates itself to transactions in commerce between the States.

*Number of State and national bank failures by years, 1865-1931.*—The table and chart following give a graphic comparison of failures in the two systems of banks, national and State, from the inauguration of the national banking system to the close of the year 1931. The relative resistance of the national system to adverse economic conditions is indicated, but it should be borne in mind that these failures, particularly since 1920, were confined very largely to small country banks. As to this particular class of banks the State institutions greatly outnumber the same class of national banks. It should be observed, however, that the ratio of numbers of State commercial banks to national is 2.24 to one whereas the ratio of failures of State commercial to national banks is 4.9 to one.

*Resources of failed banks, State and national, 1865-1931.*—It will be observed from the table and chart next following, that, with exception of the panic of 1893 and that of 1907, banking resources tied up in insolvent banks prior to 1920 were relatively small. The chief question of banking failures, therefore, falls within the post-war period, and is particularly emphasized for the year 1931 as to aggregate volume of banking resources, the failures for that year affecting \$500,000,000 of national-bank resources and \$1,500,000,000 of State-bank resources.

*Bank failures by size of capital stock, 1921-1931.*—It will be observed from the next chart that the economic depression of the past two years has caused no relative change in the character of bank failures. It is still predominantly a small-bank question. Nearly 60 per cent of the failures for the past 10 years have been of banks of capital of \$25,000 and less; an additional 9 per cent were of capital between \$25,000 and \$50,000 but not including \$50,000; 17½ per cent were of banks of \$50,000 capital up to \$100,000. In other words, about 86 per cent of all of the bank failures in the United States from 1921 to 1931 were of banks having less than \$100,000 capital. During this period only four-tenths of 1 per cent of the number of failures were of banks having a capital of \$1,000,000 and over.

*Other legislation recommended*

(a) Under the provisions of section 5202, United States Revised Statutes, as amended, national banking associations shall not at any time be indebted or in any way liable in a sum exceeding the amount of its capital stock at such time actually paid in and remaining undiminished by losses or otherwise, except when said indebtedness has been incurred in accordance with certain specific provisions of law, including liabilities incurred under the War Finance Corporation, liabilities incurred under the provisions of the Federal reserve act, and liabilities incurred under the provisions of section 202, Title H, of the Federal farm loan act, approved July 17, 1916, as amended. Accordingly, national banks which have borrowed from correspondents to an amount equal to their unimpaired capital would be legally barred from participating in the benefits of the loans made by the National Credit Corporation.

I therefore recommend to Congress that section 5202 as amended be further amended by adding an additional exception embracing liabilities created by participation in loans from the National Credit Corporation, or from any national credit association formulated in accordance with the plans of the National Credit Corporation, or on account of direct borrowings by such national banks from such corporation or associations.

(b) As shown elsewhere in this report, the activities of national banks in the administration of trust departments have greatly increased. The examination of the trust departments of national banks has placed an increasing burden on the examining force. Section 5240, United States Revised Statutes, authorizes assessments for examination of national banks, and provides in part as follows:

\* \* \* The expense of the examinations herein provided for shall be assessed by the Comptroller of the Currency upon the banks examined in proportion to assets or resources held by the banks upon the dates of examination of the various banks.

No provision is made in this section for assessment against national banks of the expense of examination of such trust departments, the result being that at the present time the assessment for the examination of the commercial departments of national banks is bearing this expense. The Comptroller is faced with the alternative of either increasing the rate of assessment against all national banks to take care of the cost of examination of banks having trust departments or of asking for an amendment to the law providing for an assessment for the examination against those banks now operating trust departments. The first method would appear to be unfair to those banks which do not have trust departments and, accordingly, I am suggesting that Congress amend section 5240, United States Revised Statutes, by giving to the Comptroller of the Currency authority to charge for the examination of trust departments.

(c) One of the greatest difficulties which confronts the Comptroller of the Currency in his endeavor to have national banks conduct their banking operations along proper lines is the character of management which he finds in some instances in banks under his jurisdiction and the inability, under present laws, to deal with this management so as to correct various violations which, if perpetuated, may lead to

disaster to the banks and to their depositors. Examinations, criticisms, and suggestions have their proper result where the character of management is such as will lead to correction of the improper practices and conditions, but where the management is such that it will persist in unsound practices, regardless of the various warnings given, the only final action left to the Comptroller is a suit for forfeiture of the charter of the corporation, which course must necessarily bring about the very result which he is trying to avoid, the closing of the bank. There should unquestionably be power lodged in a proper body to require a change in the character of management of a going national bank where the officers and directors refuse to correct conditions. In my testimony in this connection before the Subcommittee on Banking and Currency of the United States Senate at the last session of Congress, I suggested that Congress should confer upon a board to be composed of the Secretary of the Treasury, the governor of the Federal Reserve Board and the Comptroller of the Currency, the power to remove officers or directors of national banking institutions who have persistently violated the law or who continue unsafe and unsound practices. This recommendation is similar to that made by several Comptrollers of the Currency in past recommendations to Congress.

(d) The following recommendations, which were contained in my report to the Seventy-first Congress, are renewed:

1. The enactment of legislation vesting authority in the Comptroller of the Currency to examine security or investment companies affiliated with national banking associations. These companies are generally so closely allied with the national association that it is not always possible to ascertain the true condition of the national association without knowing the exact condition of its affiliate.

2. To give the comptroller supervision over national banking associations going into voluntary liquidation.

3. That a law be enacted making it a criminal offense to make, publish, or circulate maliciously, with intent to deceive, any false report concerning any national bank or any other member of the Federal reserve system, which imputes insolvency or unsound financial condition, or which may tend to cause a general withdrawal of deposits from such bank or may otherwise injure the business or good will of such bank. A bill, satisfactory to the Treasury Department, was reported by the Banking and Currency Committee of the House of Representatives at the last session of Congress, but failed of passage.

(e) The following recommendations with respect to the laws of the District of Columbia are renewed:

1. Authorization to the Comptroller of the Currency to make regulations governing savings banks and trust companies doing a banking business in the District of Columbia, and the imposition of a penalty for the enforcement thereof, such regulations to be limited so that they shall not in any case place restrictions upon such banks which are not placed by law or regulation upon national banks.

2. Prohibition of the use of the word "bank" or the words "trust company" by any firm, copartnership, company, or corporation doing business in the District of Columbia and not doing a banking or fiduciary business under the supervision of the Comptroller of the Currency, and the prohibition of the use of such words in the title hereafter granted to, or sought to be utilized by, any firm, copartnership, company or corporation doing or proposing to do a banking or fiduciary business in the District of Columbia, except with the approval of the Comptroller of the Currency.

3. Prohibition of any building and loan association from doing business in the District of Columbia or maintaining an office in the District of Columbia without first securing the approval of the Comptroller of the Currency, and provision that any violation of such law shall constitute a penal offense and be punishable in the same manner as now provided by the act of April 26, 1922, entitled "An act regulating corporations doing a banking business in the District of Columbia."

4. That hereafter no corporation be allowed to do a banking business in the District of Columbia unless organized in accordance with the provisions of the act of March 3, 1901, as amended, or organized under the national banking act.

5. That any solvent financial institution in the District of Columbia under the supervision of the Comptroller of the Currency be permitted to go into voluntary liquidation and be closed by a vote of its shareholders owning two-thirds of its stock, in a similar manner to the method now prescribed for the voluntary liquidation of national banks. The present law as to District of Columbia banking corporations is very cumbersome in that it requires a receiver to be appointed by a court and leads to reluctance by bankers in dissolving institutions in this manner, due to the fear of public misunderstanding. Thus there are in existence in the District a number of institutions whose business has been absorbed by others but which have not been completely terminated as to corporate existence.

6. That foreign corporations and corporations organized under the code of the District of Columbia, doing a banking business in said District, be required within a reasonable time to be fixed by the Comptroller of the Currency to provide for double liability on the shares of stock of such corporations in the manner required by law for national banks.

7. That it be made a penal offense for any person maliciously to make or repeat to any other person any false statement imputing insolvency or unsound financial condition of any bank, trust company, or building and loan association in the District of Columbia or tending to cause a general withdrawal of deposits from any such institution.

8. That the penal provisions with respect to banking in the District of Columbia be strengthened by providing that the general provisions of section 5208 and section 5209 of the United States Revised Statutes as amended, and section 22 of the Federal reserve act as amended, be made applicable to the banks in the District of Columbia which are not members of the Federal reserve system.

#### ORGANIZATION AND LIQUIDATION OF NATIONAL BANKS

At the close of the current year, October 31, 1931, there were 6,619 national banking associations in existence. This represents a net loss since October 31, 1930, of 599 banks, or 8.30 per cent, and \$87,735,483 in the authorized capital stock. During the current year 98 banks increased their capital by the aggregate sum of \$13,652,617. Of this number 12 banks effected the increase by stock dividends, the amount of such increase being \$752,617.

During the entire period of national banking operations, up to and including October 31, 1931, there have been authorized to begin business 13,576 national banking associations. Of these, 5,255 have voluntarily closed, some of which discontinued business; others merged with other banks, both State and national; and some consolidated with other national-banking associations under authority of the act of November 7, 1918. Exclusive of banks which failed but which were subsequently restored to solvency, the loss to the system throughout this entire period by the liquidation of banks through receiverships has been 1,702, the number of these receiverships being a fraction more than 12.54 per cent of the total number of banks organized.

During the year ended October 31, 1931, 308 national banks, with total capitalization of \$59,595,000, went into voluntary liquidation, of which number 8, with capital of \$1,275,000 and resources of \$4,920,000, discontinued business; 165, with capital of \$29,375,000, were acquired by other national banks; while 135, with capital of \$28,945,000 and resources of \$303,412,927, entered the State banking systems. This last named group included 8 banks of \$500,000 capital or over, with aggregate capital of \$18,500,000 and assets of \$190,732,620.

November, 1914, marked the inauguration of the operation of the Federal reserve system. On that date there were in existence 7,578 national banks, with aggregate capital of \$1,072,492,175, as compared with a total capitalization of \$1,660,760,146 for the 6,619 national banks in existence on October 31, 1931, a net decrease of 959 in the number of banks but an increase in capitalization of \$588,267,971. During this 17-year period 2,924 national banks were chartered, with aggregate capital of \$376,560,300, while 3,883 such associations were closed voluntarily or otherwise.

During the year ended October 31, 1931, 120 applications to organize national banks and to convert State banks into national banking associations were received, with proposed capital stock of \$13,330,000. Of these applications, 71 were approved, with proposed capital stock of \$7,960,000; 24 were rejected, with proposed capital stock of \$1,415,000; and the remainder were abandoned or no action was taken thereon. Of the 70 banks chartered, 44 were chartered to take over banks which were in weakened condition, while 7 others were organized to acquire the assets and assume the liabilities of 8 suspended national banks. Only 19 of this total number of applications were approved for the primary organization of new national banking associations.

In this same year 78 national banking associations with capital of \$9,690,000 were authorized to begin business, one of which was located in the New England States, 18 in the Eastern States, 26 in the Southern States, 23 in the Middle Western States, 8 in the Western States, and 2 in the Pacific States. The greatest activity, as indicated by the number of national banks organized, was evidenced in the following States: Texas, 9; New York, 8; New Jersey, 6; Minnesota, 6; Pennsylvania, 4; Arkansas, 4; and Indiana, 4. In other States the number ranged from 1 to 3 banks.

It further appears that of the total number of charters issued within the year ended October 31, 1931, 6 with authorized capital of \$700,000 and resources aggregating approximately \$7,455,330, were the result of conversions of State banks, 2 with capital of \$500,000 were reorganizations, and 70 with capital of \$8,490,000 were primary organizations. The business of 71 State banks, with capital of \$4,189,600 and assets aggregating approximately \$40,846,000, was purchased by national banks.

During the year ended October 31, 1931, 57 national banking associations were consolidated into 28, under authority of the act of November 7, 1918, the capital of the consolidated banks being \$8,192,500. In some instances there were reductions in capital and in others increases, the net result by reason of these consolidations being a reduction in capital stock of \$2,807,500. During the same period there were 21 consolidations under the act of February 25, 1927, involving the merger of 23 State banks with national banks, through which additional assets of approximately \$388,229,142 were brought into the national system.

#### BRANCHES

On February 25, 1927, the date of the passage of the so-called McFadden bill, there were in existence in the national system 372 branches, as compared with a total of 1,184 branches in operation on October 31, 1931.

During the intervening period 1,110 branches have been added to the system, of which 455 were de novo branches, 307 were branches of State banks which converted into national associations and 348 were brought into the national system through consolidations of State with national banks, while 298 branches were relinquished, of which latter number 155 went out of the system through the liquidation of the parent institutions, and the remainder, 143, were discontinued through consolidations and for various other reasons. The net result of these operations was a gain for the national system of 812 branches for the period under discussion.

During the year ended October 31, 1931, a net gain of 98 branches was recorded, 50 de novo branches being established, while 95 branches were brought into the system through the consolidation of State banks with national banks, a total of 145 branches. Forty-seven branches were lost to the national system, 17 through liquidation of the parent bank and 30 through action of the directors and shareholders.

There follows a summary of branch-banking operations in the national system during the period discussed in the foregoing:

**NATIONAL BANKS IN THE TRUST FIELD**

Substantial and steady progress marked the activities of national banks throughout the United States in the administration of trusts in 1931. The statistics for this function compiled as of June 30, 1931, revealed that 2,407 national banks had authority to exercise trust powers, with a combined capital of \$1,349,393,246 and banking resources of \$22,618,549,942, representing 35 per cent of the number, 80 per cent of the capital, and 82 per cent of the resources of all banks in the national banking system.

Trust departments had been established by 1,856 of these banks and 102,987 trusts were being administered with individual trust assets aggregating \$5,241,991,392. Seven hundred and eighty-two of these banks were also acting as trustees for bond and note issues aggregating \$10,719,846,426.

The growing popularity with the American public of the corporate fiduciary in the settlement of estates and the administration of trusts is illustrated by the fact that compared with June 30, 1930, the survey revealed a net increase of 11,564, or 12.6 per cent more trusts under administration in 1931 than in 1930, while the individual trust assets under administration increased \$768,950,466, or 17 per cent over 1930.

The continued growth of the fiduciary activities of the banks in the national banking system and the increasing popularity of this important branch of banking service are even more impressive when comparisons are made with the activities of national banks in this field just five years ago. In June, 1926, national banks numbering 2,026 had authority to exercise trust powers with 1,104 actively engaged in administering trusts. These banks were then acting in a fiduciary capacity for 26,053 trusts with individual trust assets of \$922,328,677 and were acting as trustees for bond and note issues of \$2,463,553,316. The figures compiled as of June 30, 1931, represent for the 5-year period, an increase in the number of national banks authorized to administer trusts of 381, or 18.8 per cent; an increase in the number of banks operating trust departments of 752, or 68.1 per cent; an increase in the number of trusts being administered of 76,934, or 295.3 per cent; an increase in individual trust assets of \$4,319,662,715, or 468.3 per cent; and an increase in the volume of bond and note issues outstanding for which these banks were acting as trustees of \$8,256,110, or 335.1 per cent.

That the growth in earnings from trust department operations has kept pace with the increased volume of trust assets which have been intrusted to the administration of the banks in the national banking system is revealed by the fact that during the fiscal year ended June 30, 1931, gross earnings aggregating \$26,888,000 were reported as against \$22,765,000 in 1930, representing a gain of \$3,923,000, or 17.2 per cent, over 1930, and an increase of \$18,433,000, or 223.3 per cent, over 1926.

The impressive indorsement of the corporate fiduciary as the conservator and administrator by the insuring public of policy proceeds is revealed by the substantial growth in the number of institutions, and the volume of insurance trusts created during the past fiscal year, at the end of which 213 national banks were acting as trustees under 554 agreements involving the administration of \$21,667,964 in proceeds from insurance policies, while 764 national banks had been named as

trustees under 17,656 insurance trust agreements not operative supported by insurance policies with a face value aggregating \$734,-830,790. Compared with 1930, these figures represented an increase of 39 per cent in the number of national banks administering insurance trusts; an increase of 39.9 per cent in the number and 60.5 per cent in the volume of insurance trust assets under administration.

The number of national banks which had been named trustees under insurance trust agreements supported by insurance policies not yet matured and operative increased during the year 12.3 per cent; the number of insurance trust agreements not operative naming national banks trustees increased 30.3 per cent, while the volume of insurance represented by the face value of the policies trusteeed under those agreements increased 25.2 per cent over 1930.

On June 30, 1931, 262 branches of national banks were actively engaged in the administration of 15,224 trusts, with individual trust assets aggregating \$1,015,325,865, and were acting as trustees for bond and note issues outstanding amounting to \$492,059,561.

The following tables show in detail the activities of national banks in the trust field, segregated, first, according to the capital of the bank; second, according to the population of the place in which the bank is located; third, according to Federal reserve districts, with a supplemental table showing the extent to which the branches of national banks are furnishing trust service to the communities in which they are operating.

## NATIONAL BANK FAILURES

During the year ended October 31, 1931, receivers were appointed for 369 national banks. Of this number, 339 were actual failures, while 30 appointments of receivers were made in order to complete unfinished business, or to enforce stock assessments the collection of which was necessary under contracts to succeeding institutions which purchased the assets of the banks under terms by which depositors were paid in full. Of the 339 actual failures, 7 were restored to solvency, leaving 332 to be liquidated by receivers. In addition to the 7 failures during 1931 restored to solvency there was one 1930 failure restored to solvency during the current year, making a total of 8 restorations to solvency during the year 1931. These figures for the year 1931 may be compared with 88 actual failures for the previous year, 3 of which were restored to solvency, with the appointment of receivers for 16 banks to enforce stock assessments. The capitalization of the 369 banks for which receivers were appointed during the past year was \$46,862,000, as compared with the capitalization of the 104 banks for which receivers were appointed during the previous year of \$8,355,000.

In addition to national banks for which receivers were appointed during the past year there were 45 suspensions of national banks during such period for which receivers have not been appointed. Of these 45 suspensions, 10 were restored to solvency and returned to directors for purpose of disposal of assets under arrangements providing for the discharge of liabilities and with the intention of going into voluntary liquidation, while 7 were allowed to open and resume business, leaving 28 still in charge of national bank examiners as of October 31, 1931.

*Receiverships, year ended October 31, 1931*

Of the 369 banks for which receivers were appointed during the past year, 275 banks with capital stock of \$32,515,000, for which receivers had submitted first reports to October 31, 1931, had total assets aggregating \$313,590,433. The capital of the 369 banks was \$46,862,000, and there had been levied by the Comptroller of the Currency to October 31, 1931, stock assessments against their shareholders in the amount of \$31,840,000. Figures as to total assets for all of the 369 banks for which receivers were appointed during the past year are not as yet available, due to the very recent dates of failure of many of these banks. The collections from these assets, including offsets allowed and collections from stock assessments, as reported by receivers to September 30, 1931, amounted to 30.71 per cent of such assets and stock assessments. These collections and the disposition thereof were as follows:

## Collections:

Collections from assets, including offsets allowed.....	\$100, 267, 946
Collections from stock assessments.....	5, 835, 141
<b>Total.....</b>	<b>106, 103, 087</b>

In addition to the above record it is found that total secured and unsecured claims proved to September 30, 1931, in connection with these banks aggregated \$126,979,939.

*Receiverships, 1865-1931*

From the date of the first failure of a national bank in the year 1865 to October 31, 1931, 1,786 national banks have been placed in charge of receivers. Of this number 84 have been restored to solvency and permitted to resume business, leaving 1,702 to be administered by receivers. Of these so administered, 713 (270 more than reported at the close of 1930) are still in process of liquidation and 989 have been entirely liquidated and the affairs thereof finally closed.

The capital of the 1,786 insolvent national banks at the date of failure was \$198,937,420. The capital of the 84 banks that have been restored to solvency was \$13,555,000. The capital of the 713 banks that are still in process of liquidation was \$75,799,500, and the capital of the 989 banks that have been completely liquidated was \$109,582,920.

The aggregate book value of the assets of the 1,702 administered receiverships, including assets acquired after suspension, was \$1,250,-448,634, in addition to which there have been levied against shareholders assessments aggregating \$132,285,740. Total collections from these assets as reported by receivers to September 30, 1931, including offsets allowed and collections from stock assessments, amounted to 50.75 per cent of the total of such assets and stock assessments. These collections and the disposition thereof were as follows:

## Collections:

<b>Total.....</b>	<b>701, 809, 627</b>

In addition to this record of distribution there have been returned to shareholders, through their duly elected agents, assets of a book value of \$16,531,331. The outstanding circulation of these 1,702 receiverships at date of failure was \$80,106,863, secured by United States bonds on deposit with the Treasurer of the United States of the par value of \$82,981,920, while total deposits at date of failure amounted to \$747,453,777.

*Active receiverships as of October 31, 1931*

The 713 banks that were as of October 31, 1931, still in charge of receivers and in process of liquidation had assets, including assets acquired subsequent to their failure, aggregating \$641,656,773. The capital of these banks was \$75,799,500, and there had been levied by the Comptroller of the Currency to October 31, 1931, stock assessments against their shareholders in the amount of \$59,087,500. The collections from these assets, including offsets allowed and collections from stock assessments, as reported by receivers to September 30, 1931, amounted to 43.71 per cent of such assets and stock assessments. These collections and the disposition thereof were as follows:

Collections:

Total.....	<u>306, 353, 142</u>

In addition to the above record it is found that total secured and unsecured claims proved against these 713 receiverships as of September 30, 1931, aggregated \$318,367,632. The outstanding circulation of the 713 receiverships at date of failure was \$36,872,016.50, secured by United States bonds on deposit with the Treasurer of the United States of the par value of \$36,935,660, while total deposits at date of failure in so far as reported by receivers amounted to \$432,599,072.

*Receiverships terminated, 1865-1931*

From the date of the first failure of a national bank in 1865 to the close of business October 31, 1931, 1,073 receiverships have been liquidated and the trusts closed or the affairs thereof restored to solvency. Included in this number are the 84 banks restored to solvency (8 in 1931) and 91 the liquidation of which was completed during the year

1931. The 989 banks liquidated by receivers had assets, including assets acquired subsequent to their failure, aggregating \$608,791,861. The capital of these 989 banks was \$109,582,920, and there were levied by the Comptroller of the Currency stock assessments against their shareholders in the amount of \$73,198,240. The collections from these assets, including offsets allowed and collections from stock assessments, as indicated by receivers' final reports, amounted to 57.98 per cent of such assets and stock assessments. These collections and the disposition thereof were as follows:

Collections:

Collections from assets, including offsets allowed and for accounting purposes, dividends paid secured creditors of all trusts finally closed Oct. 1, 1924, to Oct. 31, 1929-----	\$359, 943, 235

Total-----	<u>395, 456, 485</u>

In addition to this record of distribution, there were returned to shareholders, through their duly elected agents, assets of a book value of \$16,531,331.

From the above it will be noted that the average percentage of all dividends paid on the aggregate of secured and unsecured claims proved against the 989 receiverships that have been finally closed, but not including the 84 restored to solvency which paid 100 per cent, was 66.97 per cent. If payments to secured and preferred creditors, offsets, and other disbursements, as indicated above, were included with the dividends paid in this calculation, the total disbursements to creditors would amount to \$364,798,302, or 77.04 per cent of claims proved plus other liabilities paid but not included in the figure above of proved claims, or \$473,522,157. In making the above calculations of percentages of payments to secured and preferred creditors no consideration has been given to those liabilities to creditors not claimed, as well as secured claims which were proved and upon which dividends were paid but which were subsequently eliminated from the total of claims proved by reason of having been paid in full out of the proceeds of collateral collections. The consideration of such unclaimed items, together with secured claims proved but not included in the total thereof set out in the table above, would reduce somewhat the percentages of payments to creditors as given.

Expenses incident to the administration of the 989 closed trusts, such as receivers' salaries, legal and other expenses, amounted to \$26,831,467, or 3.93 per cent of the book value of the assets and stock assessments administered, or 6.78 per cent of collections from assets and stock assessments. The assessments against shareholders averaged 66.79 per cent of their holdings and the total collections from such assessments as were levied were 47.54 per cent of the amount

assessed. The outstanding circulation of these 989 closed receiverships at date of failure was \$43,234,846.50, secured by United States bonds on deposit with the Treasurer of the United States of the par value of \$46,021,260, while total deposits at date of failure amounted to \$314,854,705.

*Receiverships terminated, year ended October 31, 1931*

During the year ended October 31, 1931, 91 receiverships were closed, in addition to which 8 banks were restored to solvency. The total assets of the 91 receiverships, including assets acquired subsequent to their failure, aggregated \$49,643,945. The capital of these banks was \$5,057,000, and assessments against shareholders levied by the Comptroller of the Currency aggregated \$4,792,000. The collections from these assets, including offsets allowed and collections from stock assessments as indicated by receivers' final reports, amounted to 54.5 per cent of such assets and stock assessments. These collections and the disposition thereof were as follows:

Collections:

Collections from assets, including offsets allowed.....	\$27, 456, 550
Collections from stock assessments.....	2, 205, 681
Total.....	<u>29, 662, 231</u>

Disposition of collections:

Dividends paid to unsecured creditors. Unsecured liabilities at date of failure as reported by receivers aggregated \$28,838,392.....	14, 084, 324
Dividends paid to secured creditors. Secured deposits and other liabilities at date of failure as reported by receivers aggregated \$9,726,599.....	769, 361
Payments to secured and preferred creditors, other than through dividends.....	9, 088, 379
Offsets allowed and settled.....	2, 781, 079
Disbursements for the protection of assets.....	451, 811
Payment of receivers' salaries, legal and other expenses.....	2, 484, 370
Cash returned to shareholders.....	2, 607
Total.....	<u>29, 662, 231</u>

Total secured and unsecured claims proved against these 91 receiverships finally closed aggregated \$28,346,067.

In addition to this record of distribution, there were returned to shareholders, through their duly elected agents, assets of a book value of \$59,373.

From the above it will be noted that the average percentage of all dividends paid on the aggregate of secured and unsecured claims proved against the 91 receiverships that were finally closed during the year ended October 31, 1931, but not including the 8 banks restored to solvency which paid 100 per cent, was 52.4 per cent. If payments to secured and preferred creditors, offsets, and other disbursements, as indicated above, were included with the dividends paid in this calculation, the total disbursements to creditors would amount to \$27,174,954, or 66.82 per cent of the total of claims proved plus other liabilities paid but not included in the figure above of proved claims, or \$40,667,336.

It may also be of interest to note that the average percentage of dividends paid on unsecured liabilities at date of failure of the 91 receiverships that were finally closed during the year ended October

31, 1931, but not including the 8 banks restored to solvency which paid creditors 100 per cent, was 48.83 per cent. The average percentage of dividends paid on secured liabilities at date of failure of the 91 receiverships amounted to 7.91 per cent, while dividends, together with other payments to secured and preferred creditors, amounted to \$9,857,740, or an average payment on secured and preferred liabilities at date of failure of 101.34 per cent, the excess over 100 per cent being accounted for by interest payments and by payments upon secured and preferred liabilities established after failure. The inclusion of offsets allowed with dividends paid to unsecured creditors gives total payments of \$16,865,403, or an average total return upon unsecured liabilities at date of failure of 58.48 per cent, while all payments to all creditors, consisting of offsets, dividends paid on both secured and unsecured liabilities, and other payments on secured and preferred liabilities, amounted to \$26,723,143, or an average total return of 69.29 per cent upon all liabilities at date of failure in the amount of \$38,564,991. In making the above calculations no consideration has been given to additional secured and unsecured liabilities of the 91 receiverships established subsequent to failure, the inclusion of which would reduce somewhat the percentages given.

Expenses incident to the administration of these 91 trusts, such as receivers' salaries, legal, and other expenses, amounted to \$2,484,670, or 4.56 per cent of the book value of the assets and stock assessments administered, or 8.37 per cent of collections from assets and stock assessments. The assessments against shareholders averaged 94.75 per cent of their holdings and the total collections from such assessments as were levied were 46.02 per cent of the amount assessed. The outstanding circulation of the 91 receiverships at date of failure was \$2,663,582, secured by United States bonds on deposit with the Treasurer of the United States, of a par value of \$2,731,490, while total deposits at date of failure amounted to \$29,738,938.

## BANK SUSPENSIONS OTHER THAN NATIONAL

During the fiscal year ended June 30, 1931, there were 1,324 suspensions of State and private banks in the several States of the country with deposits at date of suspension aggregating \$855,328,000. In the previous year there were 687 suspensions with deposits of \$282,846,000.

Tables showing the number, capital, and deposits of suspended and reopened banks other than national and national banks in each State, for the 6-month periods ended December 31, 1930, and June 30, 1931, together with similar figures for the year ended June 30, 1931, are published in the appendix of this report. The appendix also includes a table showing the number, capital, and deposits of suspended and reopened State and national banks each of the years ended June 30, 1864 to 1931, inclusive.

### NATIONAL-BANK CIRCULATION

Bonds outstanding eligible as security for national-bank circulation on June 30, 1931, aggregated \$674,625,630, the same as on June 30 of the year previous, comprising \$599,724,050 consols of 1930; \$48,954,180 Panama Canal 2's of 1916-1936, and \$25,947,400 Panama Canal 2's of 1918-1938. On June 30 of the current year the Treasurer of the United States held as security for national-bank circulation \$593,373,300 of consols and \$73,781,500 Panama Canal 2's, a total of \$667,154,800, representing 98.89 per cent of the aggregate of circulation bonds outstanding.

The circulation of national banks outstanding on June 30 this year amounted to \$697,004,446, of which amount \$665,591,438 was secured by bonds, and the remainder, \$31,413,008, was secured by lawful money held by the Treasurer to provide for the redemption of the notes of banks retiring their circulation and on account of associations in liquidation.

### REDEMPTION OF NATIONAL AND FEDERAL RESERVE BANK CIRCULATION

During the year ended June 30, 1931, national-bank notes and Federal reserve notes aggregating \$1,551,545,109.50 were redeemed in the United States Treasury at a total expense of \$489,291.57.

Redemptions included Federal reserve notes amounting to \$1,063,997,435, and national-bank notes of \$487,547,674.50, the latter amount including \$26,660,594.50 redeemed on retirement account.

National-bank notes were redeemed at an average cost of 91 cents per \$1,000; Federal reserve notes received from sources other than the Federal reserve banks, 81 cents per 1,000 notes, and canceled and other Federal reserve notes received direct from Federal reserve banks and branches, 40 cents per 1,000 notes redeemed.

Statements showing the amount of national-bank notes, Federal reserve notes, and Federal reserve bank notes received monthly for redemption in the year ended June 30, 1931, the source from which received, and the classification of redemptions, together with the rate per \$1,000 of national-bank notes redeemed, and the rate per 1,000 notes of Federal reserve notes redeemed, are published in the appendix of this report.

### NATIONAL BANKS OF ISSUE

Of the 6,805 reporting national banks on June 30, 1931, there were 5,477 banks with capital of \$1,274,815,000 issuing circulating notes, and on the same date the amount of notes outstanding aggregated \$639,304,000. The 1,328 banks which did not exercise the circulation privilege had capital stock paid in amounting to \$412,848,000.

A table disclosing, according to reserve cities and States, the number of national banks issuing circulation, their capital, amount of circulation outstanding, together with the number of associations not issuing

circulation and their capital on June 30, 1931, is published in the appendix of this report.

There are also published in the appendix tables showing by months the profit on national-bank circulation based upon a deposit of \$100,000 United States consols of 1930, and Panama Canal bonds at the average net price during the year ended October 31, 1931. These tables are supplemented by others showing the investment value of circulation bonds quarterly, and the monthly range of prices in New York in the year ended October 31, 1931.

### CONDITION OF NATIONAL BANKS AT DATE OF EACH CALL DURING THE YEAR

Under authority of section 5211, United States Revised Statutes, national banks were called upon to submit four reports of condition during the year ended October 31, 1931, as of various dates specified by the comptroller.

Summaries of resources and liabilities of reporting banks on the date of each call during the year, together with summary for September 24, 1930, are shown in the following statement:

<sup>1</sup> Includes money held by the Cuban agency of the Federal Reserve Bank of Atlanta.

<sup>2</sup> The money in circulation includes any paper currency held outside the continental limits of the United States.

<sup>3</sup> Revised on the basis of 1930 census.

<sup>4</sup> Does not include gold bullion or foreign coin other than that held by the Treasury, Federal reserve banks, and Federal reserve agents. Gold held by Federal reserve banks under earmark for foreign account is excluded, and gold held abroad for Federal reserve banks is included.

<sup>5</sup> These amounts are not included in the total, since the money held in trust against gold and silver certificates and Treasury notes of 1890 is included under gold coin and bullion and standard silver dollars, respectively.

<sup>6</sup> The amount of money held in trust against gold and silver certificates and Treasury notes of 1890 should be deducted from this total before combining it with total money outside of the Treasury to arrive at the stock of money in the United States.

<sup>7</sup> This total includes \$30,166,138 gold deposited for the redemption of Federal reserve notes (\$1,139,730 in process of redemption), \$29,415,323 lawful money deposited for the redemption of national bank notes (\$17,859,975 in process of redemption, including notes chargeable to the retirement fund), \$1,350 lawful money deposited for the retirement of additional circulation (act of May 30, 1908), and \$11,826,948 lawful money deposited as a reserve for postal savings deposits.

<sup>8</sup> Revised figures.

**NOTE.**—Gold certificates are secured dollar for dollar by gold held in the Treasury for their redemption; silver certificates are secured dollar for dollar by standard silver dollars held in the Treasury for their redemption; United States notes are secured by a gold reserve of \$156,039,088 held in the Treasury. This reserve fund may also be used for the redemption of Treasury notes of 1890, which are also secured dollar for dollar by standard silver dollars held in the Treasury; these notes are being canceled and retired on receipt. Federal reserve notes are obligations of the United States and a first lien on all the assets of the issuing Federal reserve bank. Federal reserve notes are secured by the deposit with Federal reserve agents of a like amount of gold or of gold and such discounted or purchased paper as is eligible under the terms of the Federal reserve act. Federal reserve banks must maintain a gold reserve of at least 40 per cent, including the gold redemption fund which must be deposited with the United States Treasurer, against Federal reserve notes in actual circulation. Lawful money has been deposited with the Treasurer of the United States for retirement of all outstanding Federal reserve bank notes. National bank notes are secured by United States bonds except where lawful money has been deposited with the Treasurer of the United States for their retirement. A 5 per cent fund is also maintained in lawful money with the Treasurer of the United States for the redemption of national bank notes secured by Government bonds.

# MONETARY STOCK OF PRINCIPAL COUNTRIES OF THE WORLD

The following statement, furnished by the Mint Bureau, shows the monetary stock of the principal countries of the world at the end of the calendar years 1929 and 1930:

## Monetary stock of principal countries of the world, end of calendar year 1929

[The following compilations have been made from such data as are available. The amount of gold and silver in circulation in many countries is not obtainable, and in some countries that held by private banks can not be given.

For the United States the figures given cover all domestic gold and silver coin, but only such bullion and foreign coins as owned by the Government and Federal reserve banks. All foreign coin which comes into possession of the Government is converted into bullion.

Population figures are principally from United States Commerce Yearbook, 1930.]

**EXPENSES OF THE CURRENCY BUREAU**

By reference to the table following, showing in detail expenses relating to the maintenance of the Currency Bureau for the fiscal year ended June 30, 1931, it will be noted that the aggregate expenses were \$5,323,770.45, of which \$697,570.24 was paid from appropriations and \$4,626,200.21 reimbursements by the banks. The salary rolls aggregated \$567,524.46, of which \$256,513.52 was paid from appropriations and the remainder from funds reimbursed by the banks.

Taxes paid by national banks on circulating notes issued amounted to \$3,242,977.92. Deducting from this amount the expenses of the bureau paid from congressional appropriations, \$697,570.24, leaves the net income to the Government on account of the tax on circulation at \$2,545,407.68.

## NOTES

Act of February 25, 1863, provided for reports of condition on the first of each quarter, before commencement of business.

Act of June 3, 1864—First Monday of January, April, July, and October, before commencement of business, on form prescribed by comptroller (in addition to reports on first Tuesday of each month showing condition at commencement of business in respect to certain items; i. e., loans, specie, deposits, and circulation).

Act of March 3, 1869, not less than five reports per year, on form prescribed by comptroller, at close of business on any past date by him specified.

Act of December 28, 1922, minimum number of calls reduced from five to three per year.

Act of February 25, 1927, authorized a vice president or an assistant cashier designated by the board of directors to verify reports of condition in absence of president and cashier.

<sup>1</sup> Exclusive also of certified, cashiers', and dividend checks outstanding, and of letters of credit and travelers' checks sold for cash and outstanding.<sup>2</sup> Combined excess of amounts due to banks over amounts due from banks as shown by individual bank reports. When for a given bank amounts due from banks exceed amounts due to banks, the excess due from can not be deducted in determining deposits on which reserves are computed, and for this reason amounts in this column do not agree with the difference between aggregate amounts due to banks and due from banks. In this calculation the amounts due to banks include due to Federal reserve banks, bankers, and trust companies, certified, cashiers', and dividend checks outstanding, and letters of credit and travelers' checks sold for cash and outstanding; while amounts due from banks include items with Federal reserve banks in process of collection, amounts due from banks bankers, and trust companies in United States, balances payable in dollars due from foreign branches of other American banks, and exchanges for clearing house and other checks on local banks.<sup>3</sup> Deficiencies in reserves indicated by a minus (—) sign.<sup>4</sup> Gross deposits in nonmember banks and from which have been taken lawful deductions allowed before computing required reserve.<sup>5</sup> The cash in vault (exclusive of national-bank notes) and due from approved reserve agents.
